### Lobsterfest Fundraiser

Reniero Francisco is looking for volunteers for the summer fundraiser, as well as the following committee chairs – Volunteer Chair, Site Plan Chair and Sponsors and Exhibitors Chair. Your talent and experience can help, so please contact Reniero as soon as possible. Every member needs to participate to make it a success. Craig Kennedy is in charge of the food.

Craig Kennedy

Caroline Babott reported on behalf of Mary Cockley, Chairman of the silent auction. Donation forms are being printed and every member is asked to obtain quality silent auction items that will be bundled so that we end up with approximately 30 terrific silent auction items. We anticipate Tim Harold will donate a piece of jewelry that we will raffle off by selling opportunity tickets. Every member will be expected to sell at least 2 books – remember that Caroline is in charge of this raffle and it produces pure profit for the Club.

Carl Lachman

Carl Lachman reported that Newport-Mesa School Foundation is our lead charity. Our proposal has been accepted and we will use this network to get the word out on the Lobsterfest. The number of teachers, staff, students, parents, we have access to will certainly help our marketing efforts. You can purchase tickets to the Lobsterfest on its website (<http://www.lobsterfestatnewportbeach.com/>), face book and twitter.

### District Conference

The District Conference is scheduled for April 29 – 30, 2010 at Knott's Berry Farm Resort & Hotel. Our Club will participate on Friday's Hospitality Night with our Ice Cream Shoppe. ### [UCI Recent Tinnitus Research](#)

Tom Egan introduced Kelly Reavis, with the Dept of Otolaryngology, UC Irvine. Tinnitus is the perception of a sound in your ear when there is no noise in the environment. It may sound like a ringing, roaring, clicking, or hissing sound. It can be constant or intermittent. Tinnitus is generally associated with hearing loss. It can

also be a symptom of other problems such as problems with

Kelly Reavis

blood vessels or, rarely, tumors. There are as many as 50 million Americans who have tinnitus. Approximately 2 to 4 million have it so severely that it interferes with their daily activities. People with severe cases of tinnitus may find it difficult to hear, work, or even sleep. The sound can be ringing, constant tone, roaring, machine-like or hissing. The sound can always be present or it may come and go.

Although there is no cure for tinnitus, scientists and doctors have discovered several treatments that may give you some relief. Not every treatment works for everyone, so you may need to try several to find the ones that help.

**A book will be donated to the Newport Beach Library in the name of Kelly Reavis.**
